

BNZ Privileged User: Annual Training Policy

Please click the tick box below to confirm you have watched the “What is Privileged Access” video. Doing so confirms you understand the tools available to you for protecting our information including, spotting and reporting suspicious emails.

Remember:

- Look out for the “Get Scam Savvy” External Email alert banner and “[EXTERNAL EMAIL]” text in the subject header of every email in your mailbox (see image).
 - Any email marked as external **should** be treated with caution. Avoid clicking links before you’ve taken time to check that it’s safe:
 - Look for a sense of urgency and,
 - Pay attention to the email context e.g. what is the normal way these emails would be written and who would send them to you?
 - Any notification from a work-related application e.g. Teams, Technology Operations or someone from BNZ, including phone messages or emails with attachments, **will not** have the external email alert.
- Remember to always report suspicious emails using your Phish Alert Button or forwarding to phishing@bnz.co.nz.

For more information, please contact CyberAwareness@bnz.co.nz.

Many thanks,

Leontine
